

## Patient Evaluation of "Surgery and You" Video

The Humanization of Care Committee of the Jewish General Hospital initiates and develops projects that service the needs of patients who seek care at the hospital. Our goal is to provide the highest quality patient-centered care by promoting a culture of caring, empathy and safety. The video you viewed prior to your recent surgery is an example of this effort. We are constantly re-evaluating our projects and, therefore, ask for your valuable input.

This evaluation form is being completed by a:

Patient     Family member     Other

Please answer the following questions by indicating Yes **OR** No:

- |                                                                                               | Yes | No  |
|-----------------------------------------------------------------------------------------------|-----|-----|
| 1. This video significantly increased my knowledge about:                                     |     |     |
| a. Pre-surgery process                                                                        | ___ | ___ |
| b. Post-surgery process                                                                       | ___ | ___ |
| 2. This video decreased my anxiety about having surgery                                       | ___ | ___ |
| 3. This video prepared me for what to expect on the day of my (or my family member's) surgery | ___ | ___ |
| 4. I would recommend this video to anyone having surgery                                      | ___ | ___ |
| 5. Please indicate from which source(s) you viewed the video:                                 |     |     |
| ___ via JGH Web site      ___ at hospital library                                             |     |     |
| ___ during pre-op session    ___ using DVD given to you                                       |     |     |
